2020.2.1

Improvements and corrections

Hotfix 1 to Advance Design 2020.2 includes the following corrections:

Fix 1

- Correction of the problem of not saving cross-sectional parameters for compound cross-sections. [#19854 (Support #17650)]

Fix 2

- Correction of the problem with applying non-calibrated seismic forces to the structure when using the Canadian NBC code. [#1975, #19752 (Support #17535)].

This patch is applied only to the Advance Design 2020.2 Update.
